POTWs will be achieved instead by extending MACT requirements for industrial POTWs to area sources. These area sources are among those already listed for regulation under the urban toxic strategy required by CAA section 112(k)(3). EPA will also propose to exempt industrial POTW treatment plants which are area sources of HAP from the permit requirements in Clean Air Act section 502(a), because all applicable wastewater treatment requirements will be otherwise determined in the permit issued to the discharger.

For a period of thirty (30) days following the date of publication of this notice, EPA will receive written comments relating to the proposed settlement agreements from persons who were not named as parties or interveners to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determine, following the comment period, that consent is inappropriate, the settlement agreement will then be executed by the parties.

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general. This action may, however, be of special interest to those chemical manufacturers, importers, and processors who produce or use chemical substances that are covered by the Toxic Substances Control Act (TSCA), individuals or groups concerned with chemical testing and children's health, and animal welfare groups. Since other entities may also be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the technical person listed under FOR FURTHER INFORMATION CONTACT.

II. Purpose of the Meeting

The purpose of this workshop is to present and discuss technical information which may assist sponsors of chemicals in the VCCEP in planning, conducting, characterizing, and reporting exposure assessments. To facilitate the discussion at the workshop, EPA and invited speakers will present examples of exposure assessment for scenarios involving children and prospective parents. Additional examples will be given to illustrate the principles of consistency, transparency, completeness, and quality in characterizing and reporting of summary exposure assessment information. Papers, presentations, and examples presented at the workshop will be provided to attendees; selected EPA presentations and examples will be made available via the EPA Internet Site at *http://www.epa.gov/opptintr/chemrtk* following the workshop.

To enable the discussion, EPA has invited technical experts from industry, non-governmental organizations, and government agencies, including EPA, to discuss the presentations on exposure assessment in a roundtable format. The invited participants were selected to provide a balanced representation of stakeholder interests. Presentations by EPA and invited speakers will be followed by roundtable discussion by the invited participants. Opportunity for public comment from anyone who wishes to provide oral remarks will be provided at the conclusion of the roundtable discussion. Oral comments from the public may be limited to 5 minutes per individual to allow all those who wish to comment the opportunity to speak. Written comments may also be submitted to EPA via fax transmission to ERG at (781) 674-2906 until 1 week prior to the meeting or may be included with an evaluation of the meeting. EPA is not asking participants in the workshop to reach agreement or provide any collective recommendations on the summaries for presenting exposure assessment results. EPA's intent is to transfer technical information and the individual perspective of invited participants based upon their unique backgrounds and experiences. Accordingly, EPA does not intend to organize this workshop as an
